ABSTRACT

APRIAYUNITA 044118438. 2022. Interpersonal Communication of the Bogor Resort Police in Solving the Problem of Online Fraud in Bogor Regency. Communication Science Study Program, Concentration of Public Relations, Faculty of Social and Cultural Sciences, Pakuan University Bogor. Under the guidance of: Dwi Rini Sovia Firdaus and Yogaprasta Adi Nugraha.

This study aims to analyze the actions of the Bogor Police in solving the problem of online fraud in Bogor Regency, analyze the obstacles of the Bogor Police in solving the problem of online fraud in Bogor Regency, analyze interpersonal communication patterns for the Bogor Police during the pandemic in solving the problem of online fraud. This research is a qualitative descriptive study using Johnson's concept of interpersonal communication elements in his *Supratiks*. The source and data collection techniques obtained from this study are interviewing key informants and informants, as well as indirect observations, where the authors only at any time review the location of the writing. The data analysis technique is carried out using Miles and Huberman's data analysis techniques, namely data reduction, data presentation, drawing and testing conclusions, and checking the validity of data carried out by triangulation of sources. The results of the study are known that the Bogor Resort Police took action to solve the problem of online fraud by including penal and non-penal policies. This non-penal is a follow-up to the penal policy that is still at the level of prevention before the occurrence of crime, namely providing socialization to the community. This penal policy is a criminal act whose actions are in the form of investigations and investigations by imposing penalties. Bogor Police communication pattern with the community that is using secondary and primary communication patterns.

Keywords: Bogor Police, Interpersonal Communication, Online Fraud.
